EDUCATION

New York University | New York, NY

September 2023 – May 2027

Bachelor of Arts in Computer Science and Mathematics; Minor in Economics

GPA: 3.88/4.0

Coursework: Data Management and Analysis, Algorithms, Data Structures, OS, Cryptography, Probability & Statistics

Leadership Activities: Treasurer of The Ballet Company at NYU

May 2024 – Present

SKILLS

Python, JavaScript, C/C++, Java, Swift, AWS, SQL, React, Node.js, Docker, Git, HTML/CSS, NumPy, LLM APIs, Prompt Eng.

RELEVANT EXPERIENCE

Outset | San Francisco, CA | *Engineering Intern*

May 2026 – August 2026

- Implemented a full-stack question randomization feature for the prod app and resolved bugs across the application stack
- Authored 5 technical design specifications, translating product requirements into scalable system architectures
- Developed 3 AI-powered internal tools and automation workflows while provisioning infrastructure using Terraform

CyQuant | Paris, France | *Software Engineering Intern*

February 2026 – April 2026

- Developed a data pipeline to extract normalized cybersecurity controls and 100+ auto-generate insurer-specific forms
- Implemented frontend and backend website updates in the company's production codebase, improving user workflow
- Deployed and configured TLS certificates on Linux servers, restoring secure HTTPS communication functionality

NYU Tandon Vertically Integrated Project: AI in Education | New York, NY | *Researcher*

September 2025 – Present

- Participate in a for-credit, interdisciplinary research group applying AI to educational technology in higher education
- Perform prompt engineering across multiple LLMs and contribute to weekly literature reviews and research discussions
- Authored a product proposal for an AI platform guiding students through CS coursework with structured feedback

NYU Residential Life and Housing Services | New York, NY | *Resident Assistant*

May 2025 – Present

- Foster wellbeing for 750 residents through data-informed programming and proactive conflict resolution initiatives
- Document incidents and escalate resident concerns through established university-wide residential life workflows
- Complete incident reports during 5 on-call duty shifts per month; organize 12 community events per semester

Eagor | Remote | *Software Engineering Intern*

April 2025 – October 2025

- Worked with founders to ship 7+ features weekly in Agile sprint cycles, demonstrating product viability to investors
- Developed UI/UX for iOS app, such as toasts and profile personalization, improving experience for 100+ users
- Built a Firebase-based backend tool to auto-generate test data, streamlining 5+ pull request reviews per week

NYU College of Arts & Science | New York, NY | *IT Support Specialist Assistant*

October 2024 – May 2025

- Provided user support for hardware and software, ensuring timely and efficient service delivery across campus systems
- Supported MacOS environments by testing, deploying, and troubleshooting new applications with Jamf for end users
- Led migration of ticketing functions and infrastructure from FreshService to ServiceNow with minimal downtime

NYU Courant | New York, NY | *Grader for Discrete Mathematics and Linear Algebra*

September 2024 – Present

- Enhance student understanding of challenging concepts by providing detailed feedback for 220 students weekly
- Communicate with the professor to identify patterns in student misunderstandings, shaping future lesson plans
- Review submissions for plagiarism and AI usage, promoting honest problem solving practices among students

PERSONAL PROJECTS

[Sorora](#) (React, CSS)

Fall 2025

- Developed a React-based matching app that streamlines the Big-Little pairing process for Greek life and clubs
- Implemented a guided multi-step interface to create an intuitive user experience for collecting data and rankings
- Used SheetJS to add option to export pairings into an Excel sheet to improve user flexibility and data management
- Designed a greedy matching algorithm to efficiently pair users based on ranked preferences, respecting constraints

VioletLaundry (Swift)

Spring 2025

- Built a Swift-based iOS app to track laundry machine availability across residence halls, improving resident experience
- Implemented real-time machine status updates with in-app notifications and dynamic UI changes based on usage state
- Developed 18 app views/pages supporting machine monitoring, dorm-level navigation, and usage status display
